

# BIOINFORMATICS in IMMUNOLOGY

November 6th, 2009

- 10:00-10:04      Daron M. Standley (IFReC): *Introduction*
- 10:05-10:35      Diego Miranda-Saavedra (Univ. Cambridge) : *Transcriptional networks in haematopoiesis*
- 10:40-11:10      Shandar Ahmad (NIBIO) : *Predicting novel protein-nucleic acid interactions*
- 11:15-11:45      Mieszko Lis (MIT): *Modeling T-cell signaling with stochastic simulation*
- (Lunch)
- 13:00-13:30      Daron M. Standley (IFReC): *Functional annotation of innate immunity proteins*
- 13:35-14:05      Akira R. Kinjo (Osaka Univ.): *Musvirus database*
- (Break)
- 14:25-14:55      Ashwini Patil (Univ. Tokyo) : *Protein interaction networks*
- 15:00-15:30      Alexis Vandebon (IFReC) : *Modeling the structures of promoters of virus-induced genes*
