

The Macrophage Biology

Dr. Frederic Geissmann

William E. Snee Chair of Immunology,
Memorial Sloan Kettering Cancer Center, USA

DATE Monday, December 16, 2019

TIME 4 pm - 5 pm

VENUE Taniguchi Memorial Hall

HOST Takashi Satoh (Host Defense, IFReC)

Dr. Geissmann is a world leader in macrophage research, and won numerous awards. His research group has investigated the developmental origin and homeostasis of monocytes and dendritic cells that play a major role in diverse types of cancer and other. They are also investigating mechanisms by which tissue macrophages may control tissue growth and metabolism and whether these same mechanisms play a role in cancer initiation and development (*Website of SKCC*).
