

Immunology Frontier Research Center (IFReC) is Hiring Postdoctoral Researchers!!

WPI Osaka University
iFReC

Appointment

- Positions:** Postdoctoral Researcher
- Research field:** Immunology, Cell Biology, Bioinformatics and Bioimaging
- Place of Work:** Suita Campus, Osaka University, Osaka, Japan
- Annual salary:** JPY 5.6M - 7.5 M
- Grant for research:** JPY 3M per year
- Employment term:** 3 years renewable based on annual review

Dr. Arthur Robert Millius

There is freedom to pursue interesting fundamental questions outside the basic scope of the lab and to develop collaborations with scientists inside and outside of Japan. The equipment and space for research at IFReC is very generous.

Dr. Jason White

World-renowned researchers in a top University. You will be surprised at how easy it is to make your way in Japan without knowing the language (though I still recommend learning as much as you can!)

Dr. Shailendra Kumar Singh

The Advanced Postdoc program gave me the complete freedom to perform research of my own interest with a huge research grant support. Excellent research facilities, research environment and ongoing projects at IFReC will surely help to achieve of my future goals.

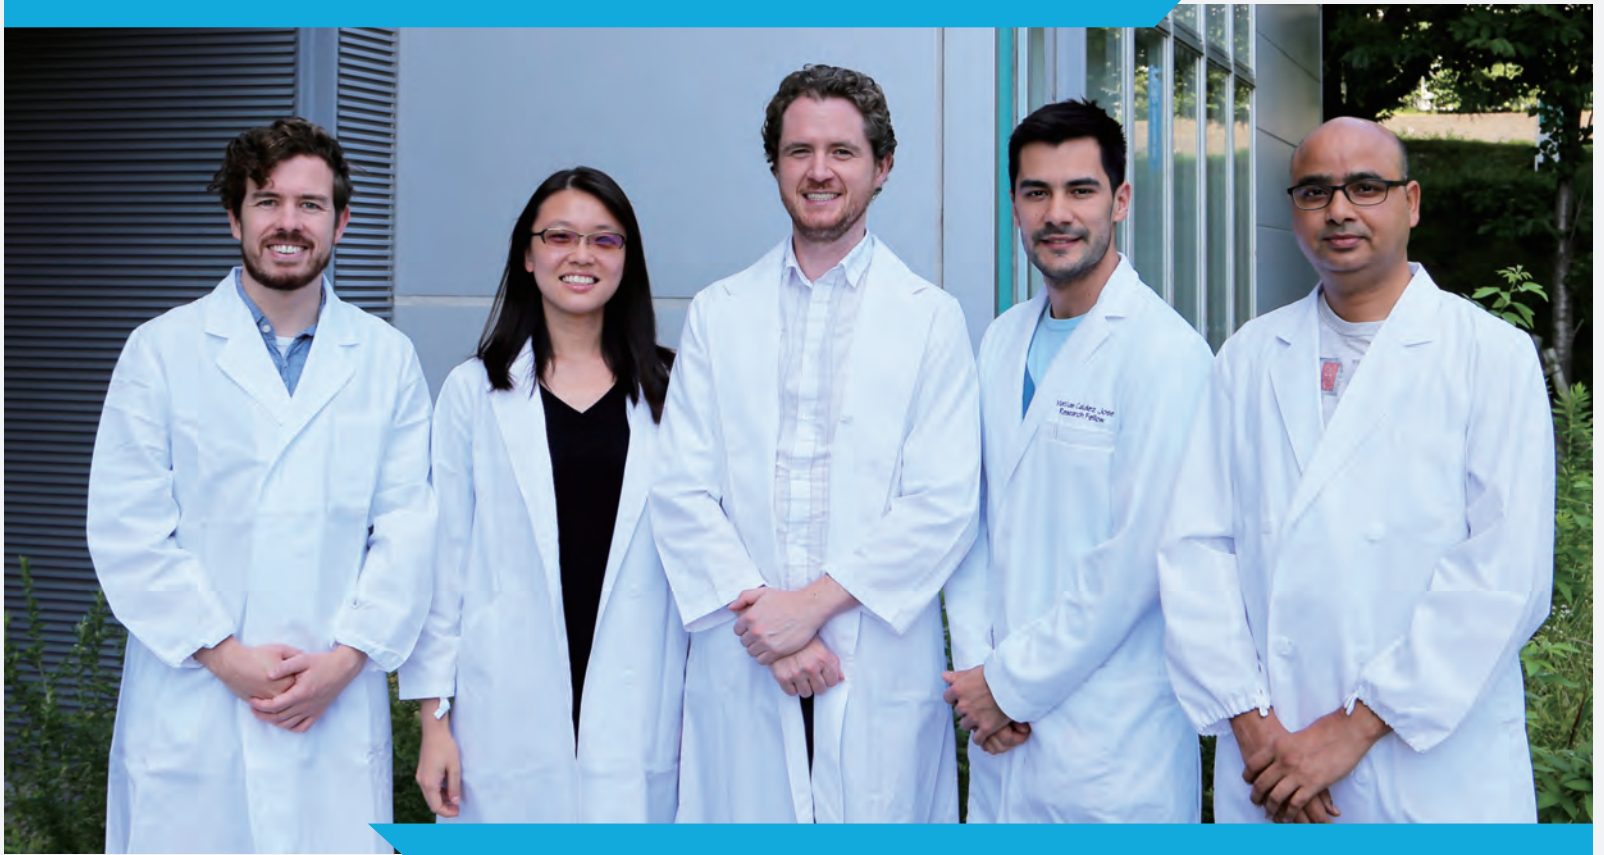

Dr. Matias Jose Caldez

At IFReC, we have a monthly colloquium with an after hour party, where we all gather to discuss common and not-so-common research interests; I find it fascinating, and what impresses me the most is the high rate of show up to the colloquium which I have not seen before in any other institute.

Immunology Frontier Research Center

(IFReC) at Osaka University is recruiting postdoctoral researchers for its original “Advanced Postdoc” program. IFReC, the top-level research center for immunology in Japan, has a team of world-recognized principal investigators using state-of-the-art facilities. Active interaction with outstanding members will enhance your productivity and achievements in your career. The center also provides information assistance in English for daily activities in IFReC. This research environment is the ideal foundation on which to base your successful career in research.

DETAILS

Number of positions: Postdoctoral Researcher x3

Research field: Immunology, Cell Biology, Bioinformatics and Bioimaging

Qualifications:

- Doctorate degree
- Less than 8 years since obtaining doctorate
- International experience preferred

Place of work: Suita Campus, Osaka University, Osaka, Japan

Annual salary: JPY 5.6M - 7.5 M

Grant for research: JPY 3M per year

Employment term: 3 years renewable based on annual review
