

APPLY FOR ADVANCED POSTDOC POSITION

POSTDOC POSITIONS WITH A GRANT TO CONDUCT ORIGINAL RESEARCH

Osaka University Immunology Frontier Research Center (IFReC), directed by Dr. Shizuo Akira, was selected in 2007 by the Japanese government as one of the nation's elite World Premier International (WPI) Research Centers. IFReC has engaged in high-level research that is expected to make it an internationally renowned immunology research center. More than 30% of approximately 150 IFReC researchers are international researchers. Experienced supporting staff support them for their lives in Japan as well as their research.

IFReC offers outstanding young researchers opportunities to work with field-leading researchers as well as to conduct their own research and publish under their own merit.

The Center has established the Advanced Postdoc system and is recruiting promising young researchers in fields of immunology and cell biology. Postdoc researchers hired under this system will be assigned to a laboratory in IFReC with an international standard level salary and research funds (3 million yen per year) to conduct original research.

NUMBER OF POSITIONS Specially appointed researcher (full-time) x3

ELIGIBILITY

Specialist field: **Immunology or Cell Biology**

Qualifications:

- (1) Doctorate degree
- (2) Less than eight years since obtaining doctorate
- (3) Outstanding performance in specialist field
- (4) International experience preferred

APPOINTMENT

Term: **One year employment renewable for a maximum of three years**

Place of Work: **Osaka University on Suita Campus in Osaka, Japan**

Salary: Annual salary 5,441,400 yen to 7,316,100 yen including social security cost

Laboratory to be belonged to:

When applying, the applicant should try to obtain the agreement of the PI of the laboratory the applicant hopes to join after appointment. We welcome applications even without agreement but please record the preferred laboratory in the research plan at application

Grant for original research: **3 million yen per year**
