

Osaka University Immunology Frontier Research Center Advanced Postdoc Position

The Osaka University International Advanced Research Institute Immunology Frontier Research Center (IFReC), as a Japanese Ministry of Education, Culture, Sports, Science and Technology World Premier Institute, has been producing research results at the world's highest level in the field of immunology since its inception. Further promotion of global brain circulation of young researchers is considered important for IFReC to continue producing such high level research results; therefore, the Center has established the Advanced Postdoc system and is recruiting promising young researchers as detailed below.

[Outline of the Advanced Postdoc System]

The purpose of the system is to promote global brain circulation in a WPI Academy Center by hiring outstanding young researchers to produce superior research results such as publication in high-impact journals after appointment at IFReC, and to promote the creation of a virtuous circle by stepping up into a higher position after IFReC.

Postdoc researchers hired under this system will be assigned to a laboratory in IFReC and will work as a specially-appointed researcher (full-time). In addition an international standard level salary, research funds (3 million yen per year) will be supplied to conduct original research.
